## 1,000,000-10,000, Paleolithic Overview.

ReGenesis is the first open-access encyclopedia to liberate pre-colonial research to its rightful 3,000,000 BCE origins
- and - liberate female spirituality.

(RGS.)

\* \* \*

Human Evolution.

The emergence of human evolution and the first ancient stone tools c. 1,000,000 BCE. (See below.)

Late Paleolithic.

Retreat of the ice sheets c. 15,000-10,000 BCE in the Magdalenian Age.

(See below.)

The two main subdivisions of the Paleolithic, or Old Stone Age, include the Early or Lower Paleolithic Age from 1,000,000-50,000 BCE and the Late or Upper Paleolithic Age from 50,000-10,000 BCE. The Early Paleolithic BCE begins with the emergence of human evolution and the first ancient stone tools c. 1,000,000 BCE \* and lasted until the Late Paleolithic with the retreat of the ice sheets c. 15,000-10,000 BCE in the Magdalenian Age. The retreat of these ice sheets was caused by sequential glaciation periods of melting due to a warming climate trend. The first known evidence of Homo sapiens ritually burying their dead is around 1,000,000-80,000 BCE. Cooking fires came into use around 300,000-250,000.

\* Earliest Stone Tool Update, 2015.

The earliest known stone tools have been discovered at Lomekwi 3 in West Turkana, Kenya. They were made 3.3 million years ago, predating the earliest sils of the first member of the human genus – Homo habilis – by about 500,000 years. 'The cores and flakes are clearly knapped,' says team member Sonia Harmand of Stony Brook University, but they are also very different from the Oldowan examples that were previously the earliest stone tools' (TFT: 12).

Further 2015 stone tools update.

In addition to the Lomekwi discoveries including primal stone tools, also see the 2015 scientific reports on the Rising Star Cave near South Johannesburg. "More than 1,500 fossil elements documenting the discovery constituted the largest sample for any hominin species in a single African site and one of the largest anywhere in the world." \* The Rising Star Cave is around 3 million years and landmark discoveries include a new hominin species called H. Naledi (star) between 2.5 to 2.8 million years old. Cave findings support a vast burial chamber of the H. Naledi (Homo habilis), "who were apparently among the first toolmakers." (CYA: A1, A3.) (Also, RGS: 538 BCE-70 CE, Second Temple Period.)

Wilford, John Noble. "Cave Yields Addition to the Human Family Tree." *New York Times*, Sept. 11, 2015: A1, A3. (CYA.)

\* Given two thirds of the fossils have yet to be microscopically analyzed, further dating determinations remain in process.

The Late Paleolithic Age is sub-divided into five BCE periods including:

Mousterian Age, 50,000 – 30,000

Aurignacian Age, 30,000 – 25,000

Gravettian Age, 25,000 – 20,000

Solutrean Age, 20,000 – 15,000

Magdalenian Age, 15,000 – 10,000

This Late or Upper Paleolithic Age began with a fuller presentation of Homo Sapiens as evidenced in an 'explosion of artistic activity' that included sculptures plus caves. \* (AAI: 162.) These sculptures and mural images included animals along with the introduction of humans. Other images are hybrid figures that are part human and part animal. (CAH: Vol. 1, Part 1; POTW: 253-254; PDA; CEOA; LOG; COG; MK.)

\* Snow, Dean. "Sexual Dimorphism in European Upper Paleolithic Cave Art." American Antiquity 78.4 (Oct. 2013): 746-761. (SDE.)

Also, as noted above, the glaciers progressively continued to shrink. As a result, areas such as present Iran and Afghanistan became desiccated whereas the Nile valley became soft, watery and fertile. (CAH: Vol. 1, Part 1, 167.)

The Early or Lower Paleolithic is from 1,000,000 – 50,000 BCE. Evidence of the initiating aspects of human culture evolution includes ancient stone tools and cave dwellings. ... Use of ocher c. 285,000 – 200,000 BCE; cooking fires came into use c. 300,000 – 250,000 BCE. ... and human burial is indicated c. 80,000 BCE. In Upper Galilee, horse bones have been found as well as evidence of human made drainage and cave remains including the rhinoceros, cave – bear, hyena, reindeer, and elephant bones. Numerous human cave dwellings have also been discovered in Syria, Lebanon, Anatolia, North Arabian Desert, and South Kurdistan. Cave remains have also been excavated in England, France, Belgium, Switzerland, and Denmark. Tools and implements include various flint

- core items, lances, bodkins (bobbins), and bone needles (RGS: 1,000,000-50,000, Early (Lower) Paleolithic Age).

Further research indicates that ancient cave artists who made the hand stencils 'were predominately female':

Snow, Dean. "Sexual Dimorphism in European Upper Paleolithic Cave Art." *American Antiquity* 78.4 (Oct. 2013): 746-761. (SDE.)

Further Paleolithic research: 1,000,000-50,000, Early (Lower) Paleolithic Age; 50,000-10,000, Late (Upper) Paleolithic Age; 50,000-30,000, Mousterian Age; 34,000-28,000, Les Eyzies Vulva Engravings, Dordogne Caves; 30,000-25,000, Aurignacian Age; 30,000-25,000, Goddess of Willendorf, Austria; 25,000-20,000, Gravettian Age; 25,000-20,000, Goddess of Laussel; 24,000, Dolni Vestonice; 23,000, Goddess of Lespugue; 22,000, Maiden with Hood from Brassempouy; 20,000-15,000, Solutrean Age; 15,000-10,000, Magdalenian Age; 15,000-12,000, Lascaux Cave; 13,000-11,000, Altamira Cave; and 12,000, Pamukkale/Hierapolis, Anatolia (Central Turkey). (RGS.)

Research on single origin, DNA, and dating refinements:

Shryock, Andrew, Daniel L. Smail, and Timothy K. Earle. *Deep History: The Architecture of Past and Present*. Berkeley, CA: University of California Press, 2011. (DH.)

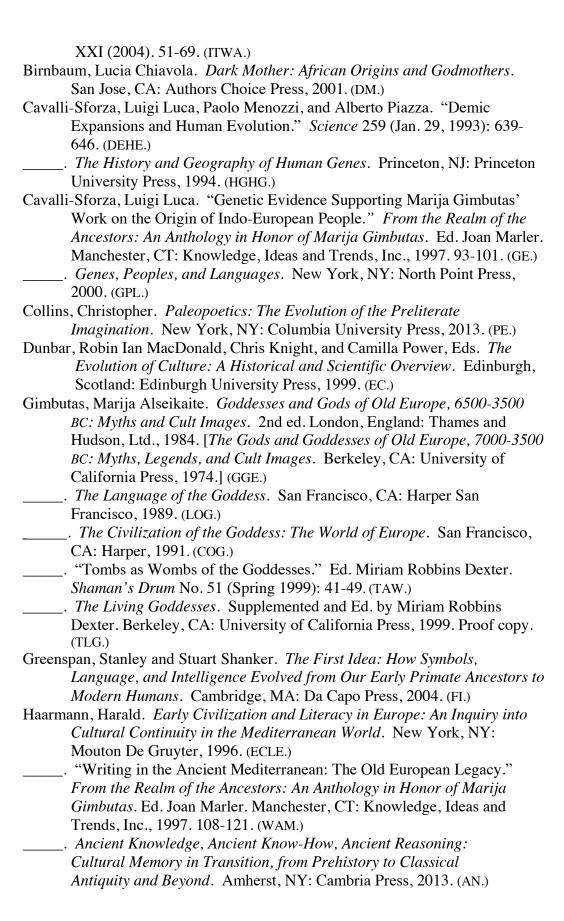

Tattersall, Ian. *The Fossil Trail: How We Know What We Think We Know about Human Evolution*. New York, NY: Oxford University Press, 2009. (FT: 209-215.)

Further 2016 DNA genetic analysis now concludes that people everywhere descended from a single KhoiSan tribe in Namibia, South Africa. Also, according to Joshua M. Akey, we "know there were multiple dispersals out of Africa, but we can trace our ancestry back to a single one." (HWG: A6.)

Zimmer, Carl. "How We Got Here: DNA Points to a Single Migration From Africa." *New York Times*, 22 Sep. 2016: A1, A6. (HWG.)

In addition to archaeologist, Emmanuel Anati; geneticist, L. Luca Cavalli-Sforza; linguist, Harald Haarmann; archaeomythologist, Marija Gimbutas; and cultural historian, Lucia Birnbaum, selected other works are recommended:

Further research on ancient Dark Mothers (Creatrix?) and related trade routes: 500,000-300,000, Dark Mother Tan-Tan of Morocco; 280,000-250,000, The Berekhat Ram Figure; 70,000, Blombos Cave and V Shaped Engraving; 50,000, African Homo Sapiens Migrations and Matrilineal Motherline; 40,000, Har Karkom: 30,000-25,000, Aurignacian Age; 30,000-25,000, Goddess of Willendorf, Austria; 26,000, Grimaldi Caves; 25,000-20,000, Gravettian Age; 25,000, Caravanserai, Trade Routes, and Dark Mothers; 25,000-20,000, Goddess of Laussel; 24,000, Dolni Vestonice; 23,000, Austrian Goddess of Lespugue; 10,000, Grotta dell'Addaura; 7000, Jericho, Canaan/Palestine: Mesolithic to Neolithic; 7000, Hieros Gamos; 6000, Sicilians to Malta; 5200, Malta and Gozo; 4700, Dolmens; 2200, Nahariyah and Ashrath-Yam; 1900-1800, Dawning of the African Alphabet and the Aniconic Goddess Triangle; 1000, Ephesus, Anatolia; 800, Tanit; 800, Carthage, Africa, the Goddess Tanit and Sacrifice; 750-650, Cybele and King Midas, Anatolia; 664-525, Neith and the Black Virgin Mary Temple at Sais, Egypt; 600, Goddess Kaabou at Petra, Jordan plus Mecca, Saudi Arabia; 400, Cathedra Goddess Isis; and 370, Isis and Philae, Egypt. (RGS.) Additional Goddess considerations from other ancient populations include: German Hoherfels (40,000 BCE); Russian Kostenki - Borshevo (25,000 BCE); \* and French Carbonnel (4,000 BCE).

\* Although Stone Age female (i.e. vulva) finds throughout Western Europe-Siberia are abundant, the archaeological male (phallus) discoveries are rare and timeline starts around 28,000-26,000 BCE. (Don Hitchcock. Donsmaps.com/venustimeline.html)

Further research on the earliest tool discoveries:

Zimmer, Carl. "Bones to Pick on Evolution." *New York Times*, Jun. 2, 2015: D3. (BPE.)

Zorich, Zach. "The First Toolkit." *Archaeology* 68.4 (Jul.-Aug. 2015): 12. (TFT.)
